ForKEEPS

Kids Embraced and Empowered through Psychological Services

ForKEEPS is an acute partial hospitalization program for children between the ages of 5 and 17 years who do not require 24-hour inpatient care, but who cannot be managed by outpatient care alone. Therapeutic services for adolescents are provided apart from services for younger children.

Our mission is to provide high quality mental health diagnoses and intensive treatment to children who suffer from emotional and behavioral difficulties that impede their ability to function successfully in a social environment.

We operate year 'round, Monday through Friday, on a full-day schedule. Length of stay is determined by the child's needs.

Comprehensive Services

Saint Peter's University Hospital's ForKEEPS program provides a myriad of comprehensive services which include:

- Individual psychotherapy
- Group therapy
- Family therapy/education
- Psychopharmacotherapy
- Academic instruction is in collaboration with the child's school district
- Treatment planning
- Transportation to and from the program for those eligible
- Daily meals
- Discharge planning
- Advocacy referral services
- Collaborative interagency services

Licensed by the State of New Jersey; Accredited by The Joint Commission; full Medicaid compliance with State Recognition; Affiliated with Children's Hospital of Philadelphia (CHOP) and Drexel University College of Medicine.

Reimbursement for Services

Financial responsibility for therapeutic services is placed with the family's mental health insurance coverage. Financial responsibility for academic instruction is placed with the child's school district.

The Treatment Team

Team members of the ForKEEPS program are committed to providing these special children with the tools they need to cope and to manage the challenges they are facing in their young lives. The treatment team consists of:

- Patient
- Family
- Program director
- Psychiatrist
- Registered nurse
- Therapists
- Counselors
- Academic teachers
- Interns
- Interagency representatives

Referral Sources

Children may be referred to the ForKEEPS program by their school nurse, child study team members, or their parents. Public agencies such as the Family Court System and the Division of Youth and Family Services may also provide referrals. Hospital pediatric inpatient units may use ForKEEPS as a "step-down" to less acute services, and outpatient mental health programs may use the program as a "step-up" to more acute services. Physicians and other healthcare providers may also refer children to the program.
