

THEY UNDERSTOOD BRAIN SURGERY AT BIRTH GAVE OUR SON A CHANCE AT LIFE

Thanks Saint Peter's

The Westdyke Family

THE NEUROSURGERY SPECIALISTS AT SAINT PETER'S HELPED HIM GROW INTO A HEALTHY THREE-YEAR-OLD.

When my husband and I found out I was expecting, we couldn't have been happier. Then we discovered our unborn son had a life-threatening brain condition and might not survive. Thankfully, the pediatric neurosurgery specialists at Saint Peter's University Hospital understood we weren't ready to give up hope. At three days old they performed an advanced surgical procedure to relieve the fluid around his brain. Today, our son is a normal three-year-old from head to toe.
